NEXA

from the house of **EXCEL**[®]
Wallcoverings

Give your space a majestic look with our gold or silver metallic wallpaper. From the house Excel – we present Nexa – a collection that give modern and stylish geometric wallpaper designs. These designs often feature clean lines, bold patterns, and a contemporary aesthetic that can add a striking visual element to any room. Geometric patterns are popular because they can create a sense of order and harmony while also making a space feel dynamic and lively.

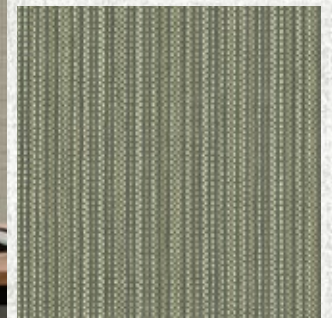

it's important to think about how the pattern and color will interact with the space. Some designs may be more suitable for larger rooms or as accent walls, while others can work well in smaller areas or throughout an entire room for a cohesive look.

Specification Sheet
